## TECHNICAL PROJECTS

### Bucket List - [Github](#) | [Demo](#)

*Users draw inspiration to create their own Bucket-List.*

- Shared data between a React frontend and a Rails backend with GET, POST, & DELETE actions.
- Utilized React Router to create 3 client-side routes in a single-page application.
- Wrote custom CSS for styling.

### Recipe Tracker - [Github](#) | [Demo](#)

*Allows users to search, add, delete, and view recipes through different categories.*

- Utilized React & Sinatra to build out front and back-end capabilities.
- Used Active Record to access and interact with the recipe database.
- Implemented full CRUD capability for recipes through Sinatra.

### Caption This Meme - [Github](#) | [Demo](#)

*This app generates memes and allows users to like and add captions.*

- Utilized JSON to access and fetch meme data from a public API.
- Added click, submit, and mouseover event listeners to engage users.
- Manipulated API data through forEach array iteration method.
